**DETAILED ACTION**

***Continued Examination Under 37 CFR 1.114***

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on January 23, 2006 has been entered.

***Response to Amendment***

2. In response to the Amendment received on January 23, 2005, the examiner has carefully considered the amendments. The claim rejection under 35 U.S.C. § 112, 1st paragraph for claims 1-19 have been overcome by the amendment and has hereby been withdrawn for consideration.

***Response to Arguments***

3. Applicant's arguments filed January 23, 2006 have been fully considered but they are not persuasive. Applicant appears to be arguing Nerad et al does not anticipate the instantly claimed invention because Nerad et al does not teach the use of thiol-ene chemistry in the absence of photoinitiators. That Nerad teaches thiol-ene systems that contain photoinitiators and systems that do not contain photoinitiator and that the examples of Nerad et al teach using photoinitiators in combination with said compounds. Applicant's arguments are noted. However, the examiner deems that an artisan of ordinary skill in that art would have found it obvious to exclude photoinitiators (exogenous photoinitiators) since it is well known that thiol-ene systems do not require photoinitiators in order to polymerized—see pages 819-820 of volume 10 of the Encyclopedia of Polymer Science and Technology (provided in PTO-892). Therefore in the absence of evidence to the contrary and/or unexpected results the rejection of Nerad et al is deemed to anticipate or, in the alternative, render the instantly claimed invention obvious.

Art Unit: 1711

Additionally the rejection of the instant claims under 35 USC 103(a) over Nerad et al in view of Hagstrom is deemed proper and still stands.

***Claim Rejections - 35 USC § 102/35 USC § 103***

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

5. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

6. Claims 1 and 6-19 are rejected under 35 U.S.C. 102(b) as anticipated by or, in the alternative, under 35 U.S.C. 103(a) as obvious over Nerad et al (5,641,426).

***Claim Rejections - 35 USC § 103***

7. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person

Art Unit: 1711

having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

8. Claims 1-19 are rejected under 35 U.S.C. 103(a) as being unpatentable over Nerad et al (5,641,426) in view of Hagstrom et al (5,578,693).

#### **Conclusion**

9. This is a RCE of applicant's earlier Application No. 10/722,478. All claims are drawn to the same invention claimed in the earlier application and could have been finally rejected on the grounds and art of record in the next Office action if they had been entered in the earlier application. Accordingly, **THIS ACTION IS MADE FINAL** even though it is a first action in this case. See MPEP § 706.07(b). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no, however, event will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
